

420 *Waldos*TM

A maroon decorative flourish consisting of a thick, curved line that tapers at both ends, positioned below the brand name.

INSTRUCTIONS • WARRANTY • WATCH CARE

1971. Five friends from California's San Rafael High School, known as the **Waldos**, are given a treasure map leading to a field of weed. They meet regularly on the school's campus at a wall by the statue of Louis Pasteur at **4:20**, get high, and go in search of the patch. During

school, they use the term "420 Louie" to remind each other of their planned quest. Eventually, the 'Louie' gets dropped. **420** becomes the slang for cannabis, and earns the group their 420Waldos nickname. Over time, the term gets picked up and spreads all over the world. The rest is  history.

Each 420Waldos Watch sold = a donation toward legalization.

With your purchase, you're helping to make  history!

420Waldos Watches feature **Visible247**, a revolutionary new illumination technology that uses miniature light receptive crystals molded into the watch dials, resulting in the highest performing photo luminescent injection molded polymers ever created.

Expose to any type of light source for just 10 minutes, and it will glow in the dark for at least 10 hours – a much more durable glow than has been possible until now. Remarkably, if it is exposed to a few hours of direct bright sunshine, it will hold its glow for a couple days! Our lume technology is available in a wide variety of color choices that glow in a multitude of colors.

Instructions

Your watch has been shipped with a battery saver clip that needs to be removed (tweezers may help!) in order to operate the crown.

TIME MODELS

- ➡ Pull crown out to 1st position.
- ➡ Turn crown to set hour & minute hands.
- ➡ Push crown back to 1st position.

QUICK RELEASE STRAP

watch care & maintenance

- Your 420Waldos watch is not designed for wear in water or submersion in water. During sudden temperature variations, condensation may appear underneath the crystal. This light fogging should dissipate on its own and will not affect the operation of the watch. If this condensation does not dissipate on its own, your watch should be evaluated by the authorized service center.
- Avoid severe impacts or drops onto hard surfaces. These can break the crystal

and affect the water resistancy and watch performance. Cracked, chipped or loose crystals should be replaced immediately.

- Dead or low batteries left in a watch can leak and damage the watch's movement. Be sure to have a dead battery replaced promptly.
- Do not clean with or expose your watch to strong chemicals, aerosol sprays, soaps or solvents as it may discolor, damage, dry out or deteriorate elements of the watch.
- In general, leather and canvas straps are not made for immersion in water. Excess water exposure can shorten the life of the strap. It is suggested that watches with leather (unless the watch strap is waterproof leather) or canvas straps not be exposed to water.

water resistance

Your 420Waldos watch is designed to withstand certain pressures of water resistance and each model is rated for water resistance to a certain depth and water activity. The Meter depth rating is not how deep the watch can go underwater – it is a measure of pressure. (See Water Resistance Rating Chart)

WATER RESISTANCE RATING

30M (3ATM)

Not Suitable for water submersion

50M (5 ATM)

Splash Resistant – not suitable for water submersion

100M (10ATM)

Suitable for surface water sports such as snorkeling & swimming

420Waldos timepieces come with a one (1) year limited warranty covering defects in materials and workmanship existing at the time of original purchase from an authorized 420Waldos dealer. The warranty does not cover normal wear and tear, batteries, crystal, strap, bracelet, loss, theft, misuse or abuse. If the 420Waldos model is discontinued and no longer manufactured, parts may no longer be available to repair your watch. If you are unsure, please contact Time Concepts: info@timeconcepts.net

Under this warranty, if the watch proves to be defective, Time Concepts, LLC will (at their option) make any necessary repairs or replace the watch. Items not covered by the warranty will be the financial responsibility of the consumer. Proof of purchase and/or the original sales receipt is needed to validate the warranty (this warranty booklet is not proof of purchase).

- Do not attempt to repair the watch yourself. You will void the warranty if you open the caseback, push the buttons underwater or neglect to push

in or screw down the crown (depending on type of crown) into its locked position before exposing the watch to moisture or submerging it in water. Repairs and battery replacement should be performed by a certified jeweler or watch technician. This will help prevent water leakage caused by improper sealing, which is not covered under the warranty. To ensure maintenance of original water resistance rating, your watch should be sent to a 420Waldos authorized service center where pressure testing is part of the service procedure.

Limitation of Duration of Implied Warranties & Limitation of Remedies:

- The duration of any implied warranty on this watch, including but not limited to the implied warranties of merchantability and fitness for a particular purpose, is limited to the duration of the limited warranty stated herein. In no event will the manufacturer be liable for consequential or incidental damages. Some states do not allow limitations on how long an implied warranty lasts, so the above limitations or exclusions may not apply to your purchase. This warranty gives you specific legal rights, and you may also have other legal rights which vary from state to state.

To send your watch in for service or a warranty repair, please contact the authorized service center. The repair center will analyze the watch and determine if it is a repair under warranty.

Please include: Contact information (phone, fax & email), return shipping information, proof of purchase (sales receipt) and a brief description of the problem.
